INTRODUCTION

Soil is the thin layer of material on the earth's surface. It is a natural resource consisting of inorganic particles and organic matter. It continually undergoes through numerous physical, chemical and biological processes.

Soil pollution is defined as the presence of toxic chemicals in high concentration in the soil. These toxic chemicals pose a threat not only to the human life but also the ecosystem. The toxic chemicals are also known as pollutants or contaminants. Pollutants are of two types: Natural Pollutants and Man-Made Pollutants.

RELATION OF THE IT SECTOR

WITH SOIL POLLUTION

On an International Level

The International Soil Reference and Information Centre (ISRIC) launched "SQAAP", an app that provides information about threats to a region's soil and nutrition depletion. Our contribution to tackle this problem known as Soil Pollution, is to create a website with an interactive interface that creates awareness and provides preventive measures and solutions to tackle

Soil Pollution and to make the world a better place to live in. This is how we are bringing the IT sector and using it to reduce Soil Pollution with the help of the people.

LANGUAGE FOR THE WEBSITE

- HTML (Hyper-Text Markup Language) - To provide structure to the website.
- CSS (Cascading Style Sheets) - For the styling of the website.
- JS (Java Script) - To make the website interactive.

DISPLAY

- The Home Page will consist of five tabs and 'Contact Us' details and it will also display information on Soil Pollution.
- The five tabs are :-
 - i) Home - It will contain details on what soil actually is and how soil pollution has an impact on everyone
 - ii) Causes - It will explain in detail what causes Soil Pollution
 - iii) Preventive Measures - This tab will contain tips and solutions to prevent and reduce soil pollution so that it doesn't harm the ecosystem and humans
 - iv) Resources - This tab will contain the links and information on the various steps the government took and will create awareness among people.
 - v) Latest updates - It will contain the latest updates on Soil Pollution.
